Cada prompt abaixo é completo e independente: é só copiar e colar. Siga esta ordem:

1. Anexe a **logo oficial** e o **LayoutDoApp.png** em todas as conversas.
2. Gere a **ficha de referência** (Prompt 1) e só continue depois de aprová-la.
3. Para as poses, **anexe também a ficha aprovada** e gere **uma imagem por mensagem**.
4. Se o gerador não fizer fundo transparente, os prompts já pedem fundo verde chapado `#00FF00`. Depois remova o fundo no Photopea ou no remove.bg e salve em PNG.

1. Ficha de referência (gere primeiro)

```
None
Use the attached official PurplePiggy logo and the attached app layout as the only source of truth.

Create a character reference sheet of the piggy mascot: front view, three-quarter view, side view, and four expressions (happy, curious, gentle and comforting, proud). Same face and proportions in every view.

Character: round, chubby, lilac-pink piggy (body color about #DD8CFA). Ears are rounded pentagon shapes tilted outward, with a purple gradient from light lilac to vivid violet and a lighter rim; they are not triangular. Eyes are small, dark and glossy, with two white catchlights and a short angled lash stroke above each eye; they are not big anime eyes. No mouth is drawn; emotion comes only from the eyes, blush and posture. Cheeks have soft pink blush with three short red hatch marks. Snout is a wide pink oval (gradient #FF8AB8 to #FF6FB5) with two tall dark burgundy oval nostrils. On top of the head there is a thin coin-slot line and a small golden coin with a "$" floating above it.

Style: soft, glossy, semi-3D vector look matching the attached layout, smooth gradients, gentle highlights, thin darker-purple outline. Friendly, warm, non-judgmental mood.

Output: all views on one sheet, light solid background, evenly spaced, no text, no labels, no watermark. No thick black outline,

no photorealism, no white sticker border, no floor shadow, no
scary or dark mood, no accessories.

Antes de aprovar cada imagem

- O rosto é igual ao da ficha (orelhas arredondadas, olhos pequenos, sem boca)?
- Não tem contorno preto grosso nem borda branca de adesivo?
- O fundo é transparente, sem halo claro ou verde nas bordas?
- A moeda tem “$” e o dourado do layout?

Se uma pose sair com o rosto diferente, não refaça do zero. Reenvie a ficha e escreva: “O rosto saiu diferente. Mantenha exatamente o rosto da ficha e corrija só: [problema]”. Se quiser, depois de gerar a ficha e a primeira pose, me mande as duas que eu aponto o que ajustar na trava do personagem antes de você gerar o resto.
